Body and soul

CURATED BY A MASTER HERBALIST, **LEAF PEOPLE** CREATES SKINCARE THAT'S GOOD FOR YOU AND THE ENVIRONMENT. BY HILAL BAHCEPE

For over seventeen years, Julie Levin and her partner Robbie have led a sustainable skincare movement which focuses on herbal and plant-based ingredients. A certified herbalist, Levin traveled the world studying the benefits of botanical traditions. “Studying plant medicine around the world and living in botanically rich environments are two of my largest influences and inspirations. I was raised in a forested area in rural Alaska where I learned how to utilize the plants and trees that surrounded me,” she says.

CALMING COLLECTIONS

Cruelty-free, ethically sourced, and vegan, Leaf People offers a range of products for nearly every skin condition and necessity. The antioxidant-based line promotes rejuvenation and firmness for aging skin, while other lines focus on nourishment to assist dry and depleted skin with ingredients to help calm, restore, and moisturize—perfect for that mile-high altitude dry skin. The brand also offers a clinical collection for post-dermatological conditions; as well as mainstream collections for men, bath, body, hair, first-aid, and aromatherapy.

HOLISTIC SKINCARE

Aside from topical treatments, the company offers a variety of options to clean and detox your skin from the inside out. Focused on supporting heart, eye, and immune health while balancing your pH, stress, and sugar-levels, Herbal Infused Drinking Vinegar in Lady Berry is a great addition to your kombucha, healthy cocktail, or sparkling water. If you're looking for something to help you energize, balance, and detox, opt for the Golden Root Adaptogen Boost infused with turmeric, ashwagandha, and maca root in your latte, smoothie, or coffee.

PLANET FRIENDLY

“We purchase ingredients from conscientious companies that utilize minimal packing materials in their shipping and alternative energy in their manufacturing. We reuse or recycle all packaging materials that we receive, and our ingredient vendors support and use the sustainable forest and organic farming techniques. We have solar energy at our lab, our bottles are recyclable, our product boxes are compostable, and each year we are wild-growing more of the ingredients for our products.” **OLM**

ETHICALLY SOURCED Owner Julie Levin creates sustainable skincare magic in her lab.

GIVING BACK TO OTHERS

In collaboration with several charities and nonprofits, 5% of Leaf People's proceeds are donated to the community. The company is devoted to sourcing its ingredients from farms with ethical working conditions and sustainable business practices—perfect for the health and environmentally conscious Colorado-consumer.
